# DELIZ

## COMPLETE POS SOLUTION

Point Of Sale software systems is a must for all sales-based businesses. Our unique POS holds together features that allow customers to make some extra savings.

### Special Features @ DELIZ

- 1 Compatible with any device
- 2 Extremely flexible and User-friendly
- 3 Multilingual multi-store retail POS Software
- 4 Multi-Currency Option
- 5 Fully integrated with inventory for real-time stock control
- 6 Works well both online and offline
- 7 Smart Watch Integration

### Easy to use POS

On the fly customisations and seamless data, mapping makes POS unique. The software is very user friendly and it allows easy Self Onboarding and implementation. No coding skills are required to customize the dashboard.

### Configure Accounting Dimensions

Dimensional accounting is made possible which allows you to maintain each segment separately, which limits the overall maintenance of GL accounts and keeps your charts of accounts pure. You can analyse the details based on the dimensions set.

### Easy Multi-Store Management

Create multiple new branches instantly and can manage them from one place. Track all the account details separately along with tracking the inventory details of each branch.

### Handle Stock Effortlessly

Check the liquidity position of all existing stock and handle complete stock management with ease.

### Loyalty Programs

-Customer acquisition and loyalty programs make POS unique.

### Additional Savings with POS Offers and Coupons

Let customers make some savings when they spend. Create some special offers or promotional schemes for selected products, accept coupon codes from customers allowing them to make some extra savings.

With our Asset Management Software, you can easily know the details of the employees in the maintenance team who are in charge of the maintenance activities of the asset.

## Asset Maintenance Log

The Asset Maintenance Log shares all the details of the upcoming maintenance schedule and also the tasks that have been carried out during asset maintenance.

## Location Wise Tracking of Assets

Effortless tracking of all your assets based on their location is now possible with the location wise tracking features of our software. Easily add or remove new locations as the software supports easy integration with Google Maps

## Track Asset Insurance Details Competently

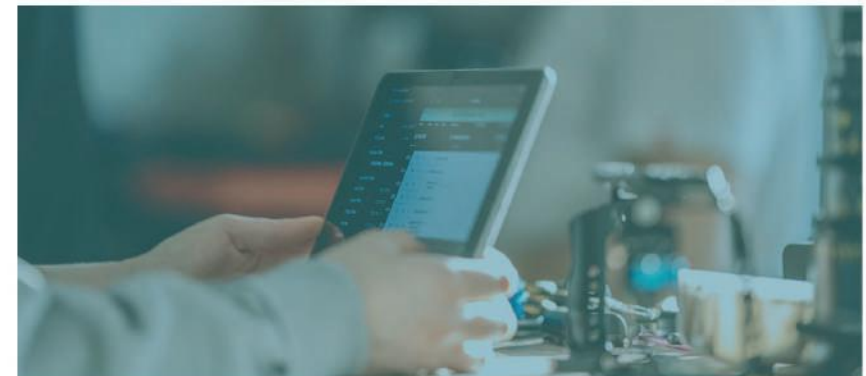

Monitoring your assets with their insurance details can be done with ease with this software. Easily keep a record of all the asset premiums and be updated on all the insurance schedules.

## Depreciation and Appreciation Schedule

Know the value of your assets over a period of time with the depreciation and appreciation schedules supported by our Asset Management Software. The depreciation ledger and the automatic depreciation entries help to keep track of them.

## Selling/Scrapping of Assets

Understand the gain or loss that have incurred on asset disposal. Maintain records of your assets that are disposed of by selling them or scrapping them.

# TASKPRO PROJECT MANAGEMENT

UPGRADE YOUR WORK STYLE WITH  
PROJECT MANAGEMENT SOFTWARE

Organize, schedule, plan and analyze projects with a task-driven approach that will streamline team collaboration and accelerate your work

## FEATURES OF PROJECT MANAGEMENT SOFTWARE

### ► All-In-One Workspace

Keep track of project deadlines and progress with a clear overview. Plan ahead for upcoming projects, using forecasts based on comparable projects, and estimate deadlines more accurately.

### ► Agile

Discover the task-driven approach to simplifying your projects. Break down your project into bite-sized tasks and assign them to your team for improved collaboration. Assess project progress and efficiency with clear scope and priorities, estimated timelines, and milestones.

### ► To-Do List & Real-Time Chat

Make work life easier with this simple, flexible project management software. Create and assign tasks to your employees. The system will automatically add the tasks in their to-dos to keep assignments and task-tracking hassle-free.

### ► Document storage

Managing projects and all their documents can be tricky, and it's crucial that everyone can access important files. ERPNext lets you upload and share multimedia files (such as images, videos, documents).

### ► Emails

Avoid stranding important emails by syncing your email accounts. With a unified trail of all correspondence and auto-replies for incoming emails, you can count on smooth communication with all stakeholders.

### ► Profitability Analysis

Stay on top of project budgets and expenses with accurate, current insights. Plan the cost for each project phase, allocate budgets against projects, and see how much of your allocated budget has been spent — all at a glance.

### ► Time-Tracking & Billing

Simplify tracking by defining actionable items — the activities for projects and tasks, based on what needs to be done. Capture resource costs and billing to get insights on project profitability.

### ► Customer access

Get everything on the record with your clients and your team. Using this module, clients can not only view project status but also raise support issues, scan invoices billed, and so on.

### ► On-The-Fly Customizations

Manage all the orders and keep track of the ordered items effortlessly

### ► Easily Customisable Invoice

Create your own open source project management software. Map your most important data by adding custom fields in your forms. Customize form behavior by auto-fetching values, hide fields based on user roles, and create custom print formats all without a single line of code.
